Educational Background

2018

Ph.D., *University of British Columbia*, Vancouver and Kelowna, Canada, research on the general area of blockchain technology, mainly focusing on layer-2 scaling of Ethereum.

2015
2017

Master of Engineering, *National University of Defense Technology*, Changsha, China, major in Computer Science and Technology.
Thesis: Research on Trust Management for Internet of Things

2011
2015

Bachelor of Science, *Beijing Institute of Technology*, Beijing, China, major in Information Security.
Thesis: Enhance Adaboost Algorithm by Integrating LDA Topic Model

Research Interests

- Blockchain & Smartcontract
- IoT Security and Privacy
- Machine Learning

Research Experience

2018 **Research and implementation on Layer 2 scaling of Ethereum**.

Role Group leader.

Description Scaling remains the primary focus of current development of blockchain. Layer 2 solutions including Plasma, TrueBit and StateChannel provide "off-chain" solutions. Current research is based on Plasma framework, addressing remaining issues.

Project website `https://github.com/gitferry/mastering-ethereum`

2017 **Research and implementation on reputation-based consensus protocol**.

Role Group leader.

Description Beyond cryptocurrencies, it is believed that blockchain can also be used to protect other properties such as reputation. This project presents a reputation-based consensus protocol called Proof of Reputation (PoR), which guarantees reliability and integrity of transaction outcomes.

Funding Agency National Science Foundation of China (NSFC).

Project website	`https://github.com/gitferry/PoR`

2016

Research on Blockchain based Identity Authentication and data protection for Internet of Things.

Role	Group leader.
Description	IoT suffers from potential systemic failures as it scales with disastrous consequences. This project proposes an integrated blockchain and IoT hardware solution to solve IoT's issues with identity, security, and interoperability.
Funding Agency	State Scientific and Technological Commission.

2015
2017

The Security Model and Mechanism of Massive CPSNet (Cyber-Physical-Social Network) towards Critical Infrastructures.

Role	Core member.
Description	In large-scale complex networks, attacks can be launched from cyber, physical and social domains. This project studies the cross-domain spreading of threats and aims to implement a multi-domain distributed collaborative IDS by semantic analysis.
Funding Agency	National Science Foundation of China (NSFC).

Working Experience

Internship

2014

Software Designer Internship, *JoyShare Inc.*, Beijing, China.
Developed an iOS App named JoyShare, which helps users share their goods online.

Teaching Assistant

2016

Cryptography, *National University of Defense Technology*, Changsha, China.
SUPERVISOR Professor Xinwen Jiang

Open Source Contributor

2018

Solidity Document Translation, *HiBlock Inc.*, Beijing, China.
Working as a member of Chinese Solidity document translation team, which is authorized by Solidity team.

Languages

Chinese	**Native**	*Mother Tongue*
English	**IELTS 7.0**	*Listening: 7.5, Reading: 8.0, Writing: 6.0, Speaking: 7.0*
Japanese	**Basic Fluency**	*Good Understanding, Medium Speaking, Basic Writing*

Skills

Programming	**Soldity, Python, C++, Go, SQL Databases, LaTeX**	
Tools	**GitHub, PyCharm, BitBucket, Vim, Docker**	*Program Version Control and Program Repositories.*

Other Skills **Communication, Organization, Writing, Translation**

Participation In Events

2015 **The 3rd Kcon**, Beijing, China.
A well known hacker meeting in China.

2017 **The 12th International Conference on Wireless Algorithms, Systems, and Applications**, *as a speaker*, Guilin, China.
An academic conference focusing on ubiquitous infrastructure and infrastructureless wireless networks.

2017 **The 5th Internet Security Conference**, Beijing, China.
The largest Asia-pacific security event with the highest level and widest influence.

2017 **Google Developer Dyas**, Beijing, China.
